PROLOGUE or INTRODUCTION.

B *BRITAIN* too long hath been abus'd with Names
Of *Whig* and *Tory*, and such knavish Schemes :
Amus'd with Fall of Monarchy and Church,
Without Support of Pope's Successive Crutch.
By these grand Cheats, *Rome's* Agents have of late
Shock'd her Religion, and embroil'd her State :
To Jesuitick Arts, and Popish Charms,
We owe our grand Misfortunes and our Harms.
In Bondage *Rome's* Delusion held her fast,
'Till *Nassau*, *Moses like*, repell'd the Blast ;
Who, sure by Providence, in Time was sent
To save her Church, Defend her Parliament :
Great *William's* Virtues and immortal Name,
All Parties sounded in the Trump of Fame,
Until for Liberty the Chief appear'd ;
The Scene then chang'd no more his Name's rever'd.
By *Rome's* black Agents join'd in close Design,
Sweet Liberty and Truth to undermine ;
To gain their Ends, these Wretches desp'rate grown,
Like *Titan's* strait Conspir'd against his Throne :
Amus'd the Mob with Views of *Egypt's* Times,
And liken'd brightest Virtues unto Crimes ;
With Schemes from *France* and *Turkey* fill'd their Brains,
And sounded all Things in Rebellious Strains :
Join'd in Designs to spread infectious Fears
And by false Murmurs set us by the Ears.
Ev'n so 'tis now, their Schemes are still the same,
To sow Dissension still's their secret Aim ;
Let who will guide the Helm all goes amiss,
In greatest Discord all agree in this !
As then the *Nassau*, now the *Brunswick* Line,
With all their Art they strive to undermine ;
Spurn at our Freedom with their utmost spite,
Tell us *French* Chains most easy are and light,
And Entail'd by Hereditary Right. }
All for their *Popish* Prince these Villians prey,
On Fools (as Knaves are won't) to make their Way.

The Protestant Remembrancer continued.

It is affirmed by the Divine Verity that *every Kingdom divided against it self, is brought to Desolation; and that every City or House divided against itself shall not stand*, Matthew 12, 25.

[T had been happy for Protestants, if they had had such
Regard to this Sacred Text as became their Profession, and from a due Consideration thereof, avoided unhappy Divisions, inhuman Disputes, unchristian Heats, and worse than Heathen Actions; which have been artfully raised, subtly kept on Foot, invidiously and industriously stimulated amongst them by the Agents of their common Enemies the Papists; from whence many Thousands of Protestants have suffered from their Brethren, as well as from those Common Enemies: So that from Persecution of Brethren, and Destructions and Desolations made by Papists, the Protestants are so much diminished, and their Power so weakened, that without the especial Favour and Protection of Divine Providence, the Remnant of Protestants will in a short Time become a Prey to the Popish Power. For it is an unhappy Truth, that they have had, and still have unchristian Differences amongst them concerning Ecclesiastical Government, Discipline, Rite, and Ceremonies of Worship, which have raised Divisions amongst them, made Parties, and each Party in their misguided Zeal, contrived and perpetrated Acts of Cruelty against their Brethren alternately, as they obtained Power; without Regard to the Sacred Christian Rule, viz. *Be as Wise as Serpents to avoid the Evil Machinations of their Enemies against them, but nevertheless as harmless as Doves to demonstrate*, that they were not only his Disciples, but Christians also.

If the Protestants had had a due Regard to these Sacred Rules, they might easily have found Methods for removing the Occasions of unchristian Divisions, Contests, and Persecutions from among them, or at least have been induced to have lived (as they ought) like Brethren; notwithstanding those Differences: And thereby have utterly defeated the evil Designs of their common Enemies the Jesuits against them.

Though

The Protestant Remembrancer, &c.

Though there be Differences among Papists, yet they mutually tolerate and bear with one another, and in Joint Concert of Council and Practice; without Division or Dissention, contrive, cultivate and carry on their Plots, and destructive Designs against Protestants and their Religion.

It was foretold in *St. John* chap. 16. v. 2, 3, *The Time cometh that whatsoever killeth you, will think that he doeth God Service, and those Things they will do unto you, because they have not known the Father nor me.* This Prophetical Declaration of Christ, may be justly applyed to the barbarous and inhuman Persecutions, which Papists have since exercised on Protestants in the Destruction of them in all Kingdoms, Countries and Places, wherever it pleased God to suffer their Power to prevail; Examples of their murdering and burning of Protestants alive, for no other Cause, but for their being Protestants, are thought by many pious and learned Men to be innumerable.

King *Edward the Sixth* made a Settlement of the Crown of *England* upon Lady *Jane Grey*, who was of the Blood Royal, viz. Grandaughter to his Aunt, Daughter to King *Henry the Seventh*, and Sister to his Father King *Henry the Eighth*. This Lady *Jane*, upon the Death of King *Edward the Sixth*, in pursuance of the said Settlement was proclaimed Queen of *England*, &c. But the Protestants imprudently falling into Divisions and Parties, *Mary*, the Popish Princess, made use of these Divisions, and applied herself to the *Norfolk* and *Suffolk* Protestants, with Solemn Promises, that no Innovation or Alteration should be made by her of or from the Protestant Religion, which her Borthor King *Edward the Sixth* had before Established by Laws and Orders publicly Enacted, and had been received by the Consent of the whole Realm.

The Protestants were credulous, believed her, and joined their Persons, Arms, and whole Force in her Defence against the Lady *Jane*, and set *Mary* on the Throne; as soon as she was established in her Power, she broke her Promise, forbade the Protestant Ministers to Preach, and inhibited the Protestants from the Exercise of their Religion, whereupon some Protestants, who had set her on the Throne, made an humble

The Portestant Remembrancer, &c.

ble Petition to her to put her in mind of her Promise to them of tolerating them in their Religion, but she told them plainly, they must and should be ruled and governed by their Head, and that they should find that she was their Head, and forthwith restored the Popish Religion, Idolatry, and all the Heathen Superstitious and profane Ceremonies of the Church of *Rome*, and burnt alive with Fire and Faggot those who would not conform to their gross and shameful Idolatry, Heathen Superstitutions, and Ceremonies.

Amongst many Hundreds of innocent Men, Women and Children, that in her Reign she and her Papist Priests burnt alive, for no other Crime or Offence whatsoever, other than for being Protestants, take the History of the burning alive of two very pious and learned Bishops of the Protestant Church of *England*, Dr. *John Hooper* Bishop of *Gloucester*, and *Nicholas Ridley* Bishop of *London*, one of them a Low-Churchman, and the other a High-Churchman, according to the then Distinction of High-Church and Low-Church.

Bishop *Hooper*, was pronounced a Heretick, *viz.* adjudged a Protestant, and condemned to be burnt alive at *Gloucester* in a barbarous and inhuman Manner, *to wit*, he was fastned to the Stake to be burnt with no more Faggots than two Horses could bring on their Backs, and those Green, by which means his Feet and Legs were roasted, then a few dry Faggots were brought which burnt his lower Parts; in the Time of this Fire he prayed to Christ heartily, this Fire spent, he exhorted the Spectators for Gods Love to let him have more Fire, for all this Time his lower Parts only did burn, or rather roast: Some short Time after, a third Fire was kindled which burnt more violently, during the Time of this last Fire he prayed with an audible Voice.

Bishop *Ridley*, though a High-Churchman, was also by his holy Brethren condemned to be burnt for being a Protestant Heretick, after the same cruel barbarous Manner as Bishop *Hooper* was burnt, for they first burnt his Feet and Legs, which made him leap up and down, and often pray them to let the Fire come unto his Body; after his Legs were nearly burnt with the Fire, he shewed them one side of his Shirt all clean and untouched, still beseeching his inhumane Executioners

The Protestant Remembrancer, &c.

cutioners to increase the Flames, and during all this extream Torment he was continually praying and calling upon God for Mercy. This Instance might be sufficient to convince us what Credit is to be given to Popish Promises, but having a little spare room I will corroborate it with another notorious Piece of perfidy and inhumane Barbarity.

It is well known that the late King of *France* was preserved by the *French* Protestants, from being dethroned, and that they supported and established him on the Throne, and that he by publick Declarations acknowledged the same, and returned 'em Thanks, and the Queen his Mother did the same; nothing in the Court or Field was more noised and fam'd, than the Loyalty of the *French* Protestants; yet this same King at the Importunities and Clamour of his Popish Clergy, broke through the known and established Laws of the Kingdom, for Toleration to Protestants, call'd the great Law or Edict of *Nants*. And as soon as this Law or Edict was set aside, and render'd invalid, the Protestants were all persecuted for Nonconformity to Popery. The Cruelties exercised by the Popish Clergy of *France*, were innumerable and so monstrous, barbarous, abominable, and detestable, that humankind cannot but tremble, when they read the *French* publick Prints, Gazetts, Harangues, Letters, and other dreadful Accounts, of those cruel and devilish Persecutions, wherein they owned it for Truth that one Hundred and Fifty Thousand Protestants, without distinction of Degree, Quality, Estate, or Sex, had the Happiness in that miserable Persecution, to make their Escape out of the Kingdom, and leave their Estates and Effects, to beg their Bread, or Starve in strange Countries: Their Cruelty towards them was so barbarously Inhumane, that they would suffer none to leave the Kingdom on pain of Death, or Condemnation to the Gallies, &c. And One Million and Half of poor innocent Protestants were inhumanly persecuted to Death, by all Manner of barbarous Tortures, as it is acknowledged by the *French* Clergy themselves.

Can you believe the Inquisition Good
 Where Churchmen wash their Hands in Laymen's Blood?
 Consider *France*, and *Spain*, see there what's done;
 Under the Plagues of *Priests*, the Laymen groan:
 Their Souls they Save, they tell you, that's their Care;
 But where such Priests Command, before Oppression's there

You must confess your Sins the ancient Way,
And what the Priests command you must obey :
Mumble out *Ave-Maries* as of old,
Tell o'er your Beads, as Usurers their Gold :
Do Penance as your knavish Priests desire,
And every little paltry Saint admire.

If mat- ters of Commerce unsettling of Bounds with the <i>French K.</i> be now upon the Tapis, I hope the Grand Allies will be on their Guard, for that Monarch fights more with his Money than with his Fleets & Armies

August hath XXXI Days.

Lament you may indeed your after Wit,
But must sit quiet still, and still submit,
To wear the gauling ignominious Chain,
And these good Keepers with your Goods maintain:
Their Wills obey, and every Word attend,
Whether their Pride or Passion do command.

 For plenteous Products, and for Feats of War :
 Not slavish *France*, with ravish'd Countries swell'd,
 Can from her Empire such great Glories yield ;
 Nor lotty *Spain*, who in exalted State,
 From *British* Arms receiv'd her Ebb of Fate.

December hath XXXI Days.

If Popery you effect, to *France* be gone;
 If Liberty you love, defend your own:
 Kick Popery out and all that love the Cause,
 Shew *British* Courage for your *British* Laws.
 If Popery's in, you can't keep Slavery out;
 'Tis true, though not believ'd by the deluded Rout.

PARTRIDGE, 1749.

Astrological Observations upon the Year 1749.

The Brumal or Winter Quarter.

THIS Quarter makes its Entrance at the Time of the Earth's touching the Northern tropick (turning us her Northern Inhabitants to our greatest Obliquity with respect to the Sun's vivifying Heat, thereby reducing our Days to their least extent, and contrary-wise extending our Nights to their utmost Length; which great Obliquity of the Solar Rays and shortness of her Stay above the Horizon, produces the Coldness of the Season, even at such Time as the Sun is nearer to the Earth, by upwards of a Million of Miles than in the Heat of Summer, when the Sun, according to Appearance, touches the other Tropical Point, viz. that of *Capricorn*; which happens upon Friday the 9th of *December*, at 21 Hours, 26 Minutes past Meridian, Correct or Apparent Time: But according to Vulgar Computation, upon *Saturday* the 10th, 26 Minutes past 9 in the Morning; when 24 Degrees of *Scorpio* are Culminant, and 19 of *Capricorn* occupieth the Ascendent; *Saturn* Lord thereof, in Conjunction with *Venus* in the ninth, beholding *Jupiter* with a Quartile Aspect in the Ascendent; the Sun in the twelfth House, Lord of the seventh (viz. of the Sign intercepted therein) separating from a Sextile of *Jupiter*, applyeth to the same Aspect of *Mars*, Lord of the ninth, and posited therein in his own Domal Dignities, the most potent Planet in the Scheme: *Mercury* Lord of the fifth and eighth, we find in the tenth House, near the Cusp of the eleventh, no way configurated with any other Planet: The *Moon* Dominatrix of the Descending Angle, is upon the Cusp of the Ascendent, applying to *Saturn* her Depositor, Lord of that Cusp with a Sextile Aspect.

At the *Lunation* immediately preceeding this Ingress, the first Degree of *Scorpio* possesses the *Medium Celi*, and 26 Degrees of *Sagitary* is rising upon the Eastern Signifier, *Jupiter* Patron of that Cusp is in this Scheme posited in the

PARTRIDGE, 1749.

second House, *Saturn* Lord thereof we here find in the tenth, conjoined with *Venus* Lady of the second, but by their Propinquity to the Cusp of the eleventh virtually in that House; *Mars* Lord of the tenth, upon the very Cusp thereof; *Mercury* dispositer of that Cusp of the seventh House, void here also of all maner of Configuration, and the *Luminaries*, in the Ascendent; the *Sun* Lord of the eighth House, and the *Moon* Governs of the greatest Part of the seventh, seperating from a Sextile of *Jupiter*, and applying to the same Aspect of *Mars*; and thus stands the Face of the Heavens at this Lunation and Solstice.

The Aspects in the Schemes themselves are neither very many, nor very Significant, the Square of *Saturn* and *Jupiter* excepted, which cannot fail of giving Disturbance in some sort or other to all Degrees of People, but more especially to such as sit at the Helm of Affairs. At the Time of my Writing these Lines the Preliminaries of Peace are agreed upon, I wish the Negotiations may be happily adjusted before the entrance of this *Quarter*, otherwise they will it's to be feared proceed very slowly, for such Positions as these are always accounted Promoters of Discord and Confusion, and too often produce Rapin and Bloodshed; but this being an Improper Season for Military Action, perhaps their Influence may be spent in hot Disputes about *Religion* and *Property*; former Mischiefs will be animated and many Controversies: It is usual for the Shrub to contend with Cedar, some Men press forward with all their Might to Fetter themselves and the whole Nation, and others hate the Confinement of a Chain, though made of *Gold*. The Sextile of the *Sun* to *Jupiter* and *Mars* are Aspects of a healing Nature, putting Sentiments of Honour into the Minds of the Negotiators, and stirring them up to an Emulation of out stripping each other in Projects of real Advantage to Society; and as the notable *Trine* of the two Superiors is approaching, I flatter myself, that Matters of great Importance will in this Year be accomplished, however slow their Advances may happen to be during this *Quarter*, which cannot be expected to be very Propitious, for besides what hath been already Observed, we have in *January* a *Conjunction* of the two *Infortunes* in *Scorpio*, a Sign of a sly Tricking Nature: Let
Honest

P A R T R I D G E, 1749.

Honest Travellers, nay, and House-dwellers too, look to it, for they will find Highwaymen and Foot-padders very Busy, as will also those Vermin concerned in Burglaries, &c. In *February* we have a famous Conjunction of the *Sun* and *Jupiter* in *Pisces*, but to frustrate the Benefits usually expected from such a Position, they are Squared by *Mars*, the God of Battle, he's unwilling to put up his Sword and rest in Peace, the *Grand Thief* hath his Emisaries still at Work: He that Ambitiously strives to be Great, cares not how he comes by his Acquisitions, but a Merciful Meek Man is content with what God pleases to lend him.

And thus I shall Conclude this Quarter with *Martial's* Advice to his Friend *Fabian*. From that Famous Poet
Mr. ABRAHAM COWLEY.

Honest and Poor, faithful in Word and Thought,
What hast thou Fabian to the City brought?
Thou neither the Buffoon, nor Band can'st play,
Nor with false Smiles the Innocent betray;
Nor fawn at Court, nor of that Number be,
That can Betray, those that confide in thee:
Nor Bribe, nor Flatter, any of the Great,
Nor with vain Promises and Projects cheat;
Nor Sneak nor Cringe to those of High Degree,
Who tho' they're Great, have poorer Souls than Thee;
Nor corrupt Wives, nor from rich Beldams get,
A Living by thy Industry and Sweat;
Nor in the Mode be Sinful to prefer,
Those more for Crimes, than Sence their Titles wear;
Nor canst thou Envy! all's below thy Hate,
Except those Villains, that Betray the State:
But you're a Man of Learning, Prudent, Just,
A Man of Courage, Firm, and fit to Trust.
Why! you may Stay, and Live unenvi'd here,
But (Faith) go Back, and keep you where you where.

viz. according to Vulgar Computation, *March* the 9th, 7 Minutes, 45 Seconds past 11 in the Morning ; at which Time we have 16 Deg. of *Pisces* upon the Mid-heaven, and 17 of *Cancer* upon the *Horoscope*. The *Moon* Lady of the Ascendent, upon the Cusp of the 11th, is seperating from a Trine of *Mars* her Dispositor (he being Lord of that Cusp, and also of the Sign intercepted in the fifth, but located in the 6th, in Quartile to *Mercury*, Lord of the fourth and 12th Houses, in Conjunction with the *Sun* in the 10th) and applying to a Sextile of *Venus* and *Jupiter*, but this Application is somewhat remote. *Jupiter* Lord of the 10th House, upon the Cusp thereof very Potent, in Conjunction with *Venus* Lady of the fifth House, and most Part of the 11th, is a very notable Position in itself, but more so by their Application to the Trine of *Saturn* Lord of the seventh, eighth, and ninth Houses, located in the fifth. It is also farther to be Observed, that *Mercury* by a Retrograde Motion seperates from the Conjunction of the *Sun* in the tenth, and applyeth to a Trine of *Saturn*, renewing as it were, or protracting

ing that friendly Aspect of those to ponderous Planets, from which Aspect they are about to seperate.

At the Preventional *New Moon*, the Aspects of the Eraticks are all the same with those at the Ingress, those of the *Moon* excepted, for here she is seperating from a Quartile of *Mars*, Trine of *Saturn*, and Conjunction of *Mercury*, but not within Orbs of any Aspect by Application. In this Scheme we have 2 Deg. of *Virgo* Ascending, and 23 of *Taurus* Culminant; *Mercury* Lord of the Ascendent, together with the *Sun* and *Moon* in the eighth House, *Jupiter* and *Venus* in the seventh, *Saturn* in the third, and *Mars* in the fourth, and thus stands the Face of the Cœlestial Canopy at the Times of this Ingress and Lunation.

These are very important Positions denoting Prosperity to Kings and Nobles, gives them Honour and Esteem from all such as owe them Allegiance, and those that in Authority make it their principal Care to promote the Welfare of all such as are put under their Protection. They Promise also great Counsels and Consultations in Order to promote Tranquillity and Peace, but we must not expect these Things to be effected at once, there are many Obstacles to be removed before all Parties can be reconciled, but this Year will doubtless put Matters into a better Posture than they have been in for several Years, all the above named Configurations tend to the Promotion of Peace and Tranquillity; there are no untoward Positions in the Ingressional Figure, save the Square of *Mars* and *Mercury*, and that may perhaps create some Disturbance and Mis-constructions, causing Delays for a Time, the Quartile also of the *Sun* and *Mars*, in that of the Lunation may be expected to give Uneasiness to a Crown'd Head, and very probably bring some notable Commander under Disgrace, and that perhaps too Justly, for the Conjunction of the *Sun* and *Mercury* denotes the Discovery of some Mischievous Design: But whatever Disturbance they may create for a while, the Glorious Trines of the *Sun*, *Saturn*, and *Jupiter*, will doubtless be attended with Glorious Effects in promoting Peace, and causing our Trade and Commerce once more to Flourish.

Summer.

THIS Quarter enters with the Earth's approach to the Southern Tropick, at which Time, by the constant Parallelism of her Axis, she brings us and all other her Northern Inhabitants to our greatest Inclination towards the *Sun*, thereby affording us our greatest Portion of his Light and Heat; both by reason of his Rays falling upon us more directly (*viz.* their Line of Direction coming nearest to a Perpendicular of the Earth's Surface) than at any other Season of the Year; and also upon account of their continuing longest above our Horizon, affording us our Longest Day and Shortest Night. The *Sun*, at this Time according to Appearance, acquiring the first Point of the Northern Tropical Sign *Cancer*, thereby approaching nearest to our *Zenith*, which this Year happens according to Astronomical Observation upon the 9th Day of *June*, 22 Ho. 36 Min. 27 Sec. past Noon, according to True or Apparent Time, vulgarly *June* the 10th, at 36 Minutes, 27 Seconds past 10 in the Morning, when 15 Degrees of *Virgo* possess the Eastern Signifier, and 11 of *Gemini* are Culminant; *Mercury* Lord of both these Angles, but located in the eleventh, beholds *Jupiter* Lord of the fourth and seventh (and placed in the latter) with a Trine Aspect, the *Sun* and *Venus* conjoined in the tenth House, the first Lord of the twelfth, and the other Lady of the second and ninth, behold *Jupiter* with a Quartile Aspect, and *Mars* with an Opposition; *Mars* at this Time located in the fourth House, but Lord of the third and eighth, hastening to a Trine of *Saturn*, at the same Time, he Lord of the fifth and sixth Houses: The *Moon* Lady the eleventh, and Dispositor of *Mercury* be near the Horoscope, disposed by him also, may be adjudged essentially Dignified, and is separating from a Trine of *Mars*, an applying to a Sextile of *Saturn*, these two having lately beheld each other with the same Aspect.

At the *New Moon* preceeding this Ingress, we have 16 Degrees of *Aquarius* upon the Horoscope, and 11 of *Sagitary* Culminant: Here *Saturn* is in the eighth House, *Jupiter* in the Ascendent, *Mars* in the eleventh, the *Sun*,
Moon,

PARTRIDGE, 1749.

Moon, and *Venus*, in the fourth, and *Mercury* upon the Cusp of the sixth, Opposed by *Mars*, but in a Trine Aspect with *Saturn*.

These Dispositions of the Celestial Choir are not so harmonious as those at the Vernal Ingress, contrarywise they seem to import greater Heats and Animosities, sharp Contests about Religious Matters, and perhaps some *Donations*, or Ecclesiastical Inheritances may be disputed and objected to; it seems as though these Dissensions will be carried very high, so as to produce great Clashings and Contradictions in Councils, one Faction opposing another, and every Disputant driving at his own Private Interest to the Prejudice of the Publick: In a Word, this is likely to be a very busy Quarter, particularly in Consultations and Councils; but those greatly Impeded by thwartings and forming of Parties, which is the only Evil to be apprehended (in this Nation at least) we have a Restless Tribe amongst us, that know not how to be Content, and the Reason is Obvious, the Proud in Heart always seeks to exalt himself, many Heats and Animosities arise, and no body (that Monster of Monsters) in Fault. If we believe the Holy Scriptures we may there see what befel the Rebellions Israelites under the Law, and also the stub Jews that would receive the Gospel of our Lord and Saviour, but persecuted Him and His Followers unto Death; for which enormous Crimes God suffered them to fall into Dissentions and Divisions amongst themselves, by which means they were overthrown and dispersed: Had *Jerusalem* been United, *Titus* had never sack'd it, nor can the *Pope* and all his Emissaries ever prevail over this Nation, can we but be so wise as to be united amongst ourselves. But like the Lion in the Fable wear himself out with seeking whom to devour, 'till he become unworthy either our Fear or Envy.

An old weakly Lion, whose *Teeth* were all gone,
Was *piti'd* by *few*, but was *dreaded* by *none* :
The *surly wild Boar*, made bold to *desse* him ;
The *Bull Gord* his Sides, when e'er he came nigh him :
He every Day meets with *Fronts* and *Disgraces*,
He is *Butted* by *Ram*, and kick'd at by *Asses* ;

Autumn.

THIS Quarter begins with the Earth's entrance into the Equinoctial Sign *Aries*, when the *Sun*, according to appearance, obtains the oppoſite Point, namely, the beginning of *Libra* : at which Time the Track of the *Sun's* apparent Diurnal Motion travels the Earth's Surface at Right Angles, to the Axes of her Rotation and Equidistant from each Pole, cauſing the Days and Nights to be equal in Length quite through the Habitable Parts of the Globe, excepting that ſmall variation ariſing from the Refraction of the Atmosphere, which in all Places gives the Days the Advantage.

This Ingreſs, take it which way you pleaſe, happens upon Monday the 11th of *September*, 11 Hours, 46 Minutes, 38 Seconds paſt Noon, according to Correct or Apparent Time ; vulgarly 46 Minuets, 38 Seconds, paſt 11 at Night, at which Time 26 Degrees of *Piſces* poſſeſs the *Medium Celi*, and 24 of *Cancer* Aſcend : The *Moon Lady* of the Aſcendent in the eighth houſe, ſeperates from a Trine of *Mercury*, Lord of the third and twelfth Houſes, and applies to a Quartile of *Saturn*, Lord of the ſeventh and eighth, the firſt of theſe located in the fourth, ſeperating from a Conjunction of the *Sun*, and applying to a Square of *Mars* and Conjunction of *Venus*, *Mars* at this Time, in the ſixth Houſe in *Capricorn*, applying to a Sextile of *Saturn*, with Reception they being in each others Dignities, behold Potent *Jupiter* alſo with the ſame Aſpect, whilst *Jupiter* himſelf exalted on the Cusp of the Houſe of Honour, halts by Retrograde Motion to the Salubrious Trine of *Saturn*, from which he never deviates the quantity of 6 Degrees during the Reſidue of this Year ; but after becoming Direct in Motion, repeats the Aſpect again in *February*, in the third Degree of *Aries*, *Saturn* having at that Time acquired the ſame Degree of *Sagitary*, but in *March* they will

be

be quite seperated after having been no less than six Months in Trine to each other, and both of them very Potent (especially *Jupiter*) during the whole Time of this Benevolent Aspect. At the preventional *New-Moon* we have 15 Degrees of *Capricorn* upon the *Mid-Heaven*, and 5 of *Taurus Ascending*. In this Scheme *Venus* Lady of the Ascendent is in the sixth House, but well dignified, seperating from a Quartile of *Mars* in the ninth, Lord of the seventh, *Saturn* Lord of tenth, in the seventh, is here in Trine to *Jupiter* Lord of the eighth and twelfth, he posited in the latter, in his own Domal Dignities; The *Sun*, *Moon*, and *Mercury*, all the sixth Houle Conjoined in *Virgo*, seperate from a Sextile of *Saturn*, and apply to an Opposition of *Jupiter*, *Mars* here as well as at the Ingress, applying to a Sextile of *Saturn*, they at this Time also in each others Dignities. These are the Positions and Configurations of this Ingress and Lunation, which in general seem greatly disposed to promote Reconciliations and Agreements amongst contending Parties, if a Peace is not before this Time settled and concluded (which at my present Writing seems to be in agitation) these Noble Positions will doubtless bring it to Perfection, or if it's already over, we may about this Time expect some notable Overtures in Order to make it more firm and durable; But, however these Things be, there will it's to be fear'd even amidst these Pacifick Proceeding, be some untoward Janglings and Discords of a *Religious* Nature, caused chiefly by such Hypocritical Persons as wear the Badge of Sanctity, but are no better than Wolves in Sheeps Cloathings; in short, *Quarter* brings ill News to the Reverend Clergy, or some Persons of sacred Function: But as those that wear the venerable Badges, are employed in the most sacred Offices, will misapply the Trust reposed in them, they must Blame themselves if they suffer. But it is to be observed that *Jupiter*, the Patron of Religion, is very Potent, which will doubtless enable its Voteries to make a noble Stand, and put Religious Affairs upon a better Footing than they have been for some Time past; and I hope before the Conferences for Peace and Concord are concluded, the Protestants in Foreign Parts will be remembered, that they enjoy as well Peace and Liberty in their Religion (which concerns their Future Happiness)

as the Name of a Temporal Peace here, whilst Sanctified Blood Sucking Villains are contriving how to cut their Throats in Cool Blood.

Let the Eminent Negotiators for Peace be well upon their Guard, that it may be rendered firm and lasting, which can never be expected 'till the grand Disturber is brought to such Terms as may keep him within Bounds, and Curb his Ambitious Spirit; for it cannot be forgot how we were Trick'd in a late Treaty, and if the Confederates are not well upon their Guard, they may perhaps be brought to those Circumstances represented in the following Fable of Wolves and Sheep.

‘ Upon a Treaty for quieting old Grudges between the
 ‘ Wolves and the Sheep, a Truce was made and Hostages
 ‘ delivered; The Wolves gave their young Ones, and the
 ‘ Sheep in Exchange, gave their watchful Guard of Dogs:
 ‘ The Innocent Sheep suspecting nothing, were quietly Feed-
 ‘ ing, when on a sudden the young Wolves growing Hungry,
 ‘ and missing their Dams, set up loud and violent Howlings;
 ‘ the Old Wolves who expected it, and watched for the Sig-
 ‘ nal, rush in upon the Harmless Flock, and exclaiming on
 ‘ them for perfidious Truce-breakers fell upon them, Worry
 ‘ and Slaughter them, being deprived of their usual Guard
 ‘ the Dogs.

 How they engage themselves in Costly War:
 Emptying their Purses, and becoming Tools
 Unto unthinking hot Brain'd Fighting F——lls.
 These cut War's Hydra only with Design,
 That it may Bud, and so grow out again;
 Let these, if ever Arms they mean to take,
 Do it with Courage for their Country's Sake:
 To Wars let such Men go, and when they cease,
 Ne'er trust Monsieur to make a Patch'd up Peace;*

Upon the Eclipse.

THIS Year affords five Eclipses, three of the *Sun*, and two of the *Moon*, one only of each Luminary Visible in these Kingdoms.

The First is an Invisible one of the *Sun*, upon *Saturday* the seventh of *January*, about our Seven at Night; this Eclipse, tho' Invisible to all *Europe*, will be very Conspicuous in *America*, particularly in the Southern Parts thereof, for in South Lat. 18 Deg. 106 Deg. West Longitude from *London*, viz. in the Pacific Ocean, about 100 Leagues from the South West Coasts of *Pery*, and 740 South of *Zacatula*, upon the South West Borders of *New Spain* it will be Total and Central in the Meridian.

The Second is a very small one of the *Moon*, upon *Monday* the 19th of *June*, about our Nine in the Morning, consequently Invisible to us; but in *America* this Defect will be Visible, which will not amount to above two thirds of a Digit, viz. one Eighteenth Part of the *Moon's* Diameter.

The Third is a Central and Annular Eclipse of the *Sun*, upon *Monday* the third of *July*, about Half an Hour past our Noon, but the *Moon's* South Latitude and Parallax, prevents its being seen in these Parts, but in *Africa*, *South America*, and the *Eastern* and *Ethiopian* Seas, the Defect will be very considerable; for in 6 Degrees of North Latitude, about 9 Degrees West from *London*, about 200 Leagues South of *Cape Palma*, upon the Ivory Coasts of *Guinea* the Eclipse will be Central and Annular at Noon.

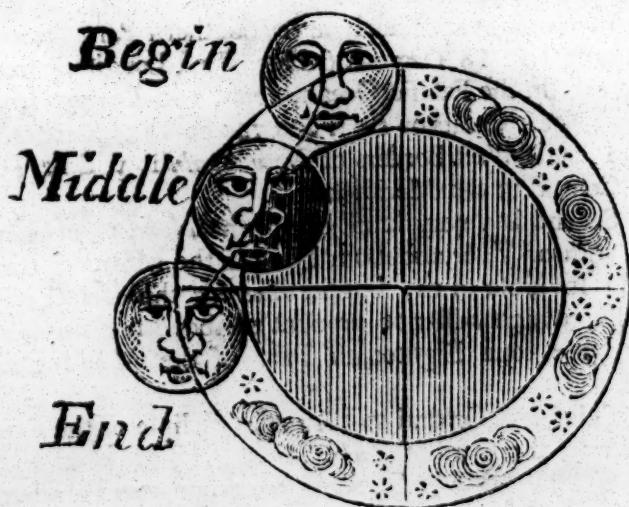

The Fourth is a Visible Eclipse of the *Moon*, upon *Tuesday* the twelfth of *December*, at the Middle of this Eclipse the *Moon* is Vertical to that Part of the Gulph of *Ormuz*, lying betwixt *Fez* upon the South Coast of *Persia*, and *Kel-lat* upon the North East of *Arabia*; consequently this

PARTRIDGE, 1749

Eclipse is Visible quite throughout *Europe, Asia, Africa*, most of the Southern and Eastern Islands, &c. with us at *London*.

The Fifth and last, is an Eclipse of the *Sun*, upon *Thursday* the 28th of *December*, in the Morning with us, and Visible in our Hemisphere; the Beginning happens some few Minutes before the *Sun's* Rising in these Kingdoms, but in *Holland, Germany*, and the more Easterly Parts of *Europe*, as well as *Asia*, the whole Eclipse will be Visible. With us at *London* the Defect is near two Digits at the *Sun's* Rising, see the following Calculation and Type adapted to this City, which may serve for the whole Kingdom, with this Consideration, viz, that towards the North the Defect

ARTIFICIAL Teeth, set in so firm as to eat with them, and so exact, as not to be distinguished from Natural: They are not to be taken out at Night, as is by some falsely suggested, but may be worn Years together: Yet are they so fitted, that they may be taken out and put in by the Person that wears them, at Pleasure; and are an Ornament to the Mouth, and greatly helpful to the Speech. Also, Teeth cleaned and drawn, by *Samuel Rutter* and *William Green*, Operators, who apply themselves wholly to the said Business, and live in *Raquet-Court, Fleet-street, London*.

Pharmacopœia Universalis: or, a new Universal English Dispensatory. By R. JAMES, M. D

AS some Reasons may be expected for publishing an English Dispensatory; after so many have already made their Appearance. In the first Place it must be consider'd, that since the Publication of the latest of those now in Being, the Physicians of *Edinburgh*, have publish'd an excellent Dispensatory, and this Example has been just followed by our own College, both which are insert'd in this Work, in Order of Place: Besides which, *Boerhaave*, *Stahl*, *Hoffman*, *Newman*, and several other Writers of the first Class, have made many useful Discoveries in the Chymical Pharmacy; to which it appears they were absolute Strangers, and many Advances have been made towards a more certain Acquaintance with the *Materia Medica*, which either escaped the Researches of former Compilers, or came to the Knowledge of the learned World too late to be insert'd in their Writings.

These Circumstances have enabled me to supply their Deficiencies, and to enrich the Theory and Practice of Physick, with the following Particulars.

I. By explaining the natural and artificial Instruments of Pharmacy, with their Uses and Effects in the different Operations.

II. By giving an Account of the various Classes of Medicinal Simples, in Dissertations on each; wherein Rules are laid down for their Exhibition, and their Uses in Practice illustrated.

III. By giving an accurate Account of each individual Simple commonly known in Practice, and specifying their particular Virtues.

IV. By explaining their various Combinations, and Uses when compounded. And in this Part, all the Officials directed by the Colleges of *London* and *Edinburgh*; together with many others of great Importance in Practice, from foreign Authors will be describ'd.

V. By laying down Rules for extemporaneous Prescriptions.

VI. By calculating the exact Proportions of Simples in each Composition. *London*: Printed for James Hodges, at the Looking-glass over against St. Magnus's-Church, London-Br.
